William Heeb

Software Engineer

SUMMARY

Innovative and detail-focused software engineer with a keen passion for AI. Demonstrated success in developing and deploying effective front and back end web applications. Eager to contribute my skills to a tech powerhouse with a global footprin. I Discovered my passion for coding five years ago while testing software builds, and since then, I've been dedicated to pursuing a career in software engineering.

Software Engineer at Degen Launchpad(Name subject to change)

March 2022 — Present

- Collaborated with the client to build their vision of a responsive web3 website

- Changed stratigies on the tech stack often in order to maintain the highest level of Security while thinking about accessibility.

- Utilized private RPC endpoints while incorporating custom api's.

Software Engineer at 100devs, Los Angeles, CA

March 2021 –Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices while testing new frameworks.

- Built semantically structured full stack web applications. Automated tests to save 55% space.

- Applied agile methodologies like SCRUM form project management for all CRUD apps.

Lead Mentor Tech for 45 technicians and beta app tester for Sears Home Service

Feburary 2016 — Present

- Testing weekly routing app before we release it to all 3,000 techs nationwide.
- Mentoring my team of technicians daily with helpful dignostic steps while completing my own service route.
- Performing electrical tests(finding where the failure is with voltage verification at test points.
- Holding my team accountable and holding them to a standard of professionalism that we have curated in my terirorry.(top 5 team in the country in all categories driving $250,000quarterly profit from no profit before I became lead)

Recent Projects:

Discord Web3(Fullstack Interactive Web App)

Log in and share links/videos that helped individuals along their learning path. Learn and navigate the crazy web3 space securly. Upvote useful links/critical info in real time.

Addicted's App(Fullstack Web App)

Users can login with a profile(verified nft for pic). Upload info about learning protocols/security/blockchain analysis. Upvote useful posts for vote based views.

Volunteering: 1WP LLC London, UK

March 2021 — Present

Helped organize teams for project creations. Initiated and led teams to build/arcitect all project needs.
